German [B] Drama [C]

BA (Hons) 2:1 in Multimedia Design and Digital Animation with a specialization in website design and development (University of Central Lancashire)

Through my education I have discovered a passion for designing and developing digital multimedia. With a life-long interest in art, photography and visual design, combined with seven years experience with Photoshop, I now have the unusual ability to create a visually appealing interface with an intuitive user experience. I have a sound knowledge of website production (from concept to completion), I am proficient in Dreamweaver and have a strong ability to hand-code HTML and CSS to W3C standards with cross-browser compatibility. I achieved a Distinction grade for Flash in my college final project, and am confident coding in Actionscript 2 and creating vector-based designs in Illustrator.

Work Experience

2009 Freelance - **Wits End Dog Training:** Palo Alto, CA
www.witsenddogtraining.org

Web Designer / Developer

- Website design and development
- XHTML, CSS, PHP & MYSQL development and coding
